

DIAGRAM OF THE PLAYGROUND

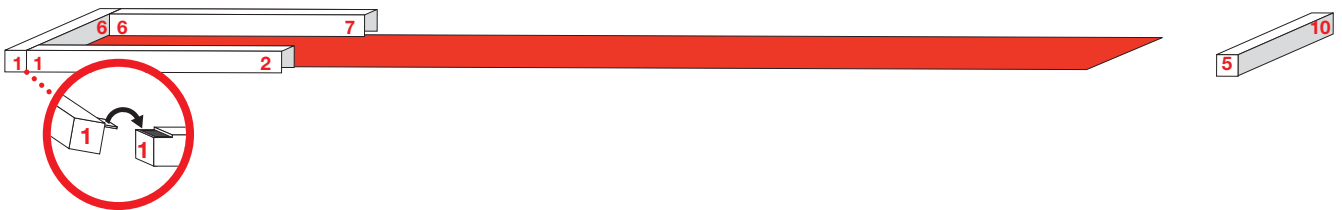

The playground consists of a carpet, 2 head borders and 2 side borders.
The head facing borders are numbered 1/6 and 5/10.
The two side facing borders are made of 4 casings each, numbered 1 to 5 and 6 to 10.

ASSEMBLY

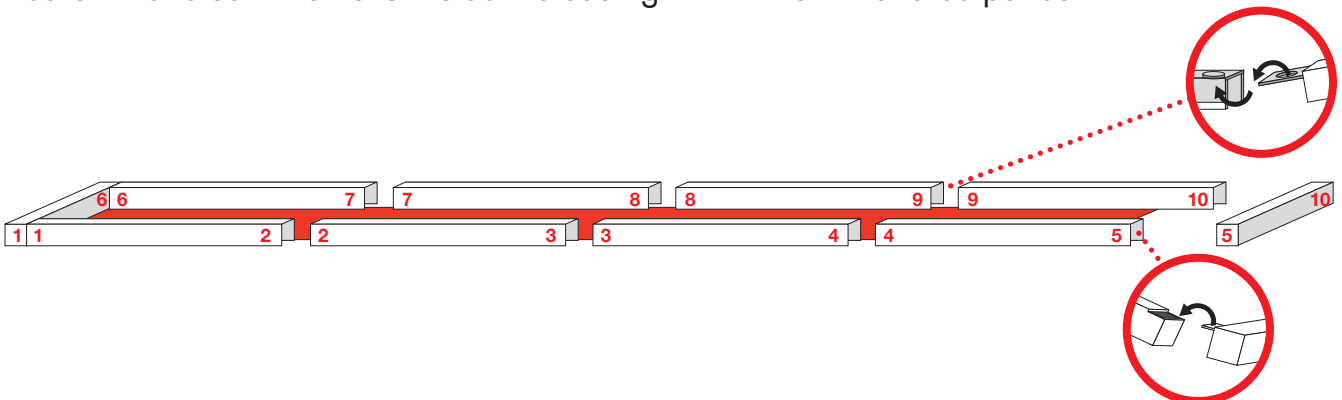

1. Unroll the BOOGLE[®] red premium carpet on a flat hard surface.

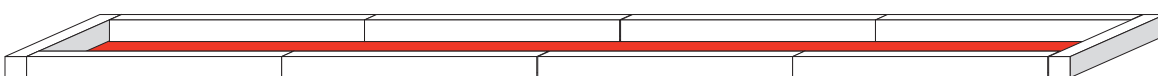

2. Put head facing border number 1/6 down and join a side facing casing on both sides, i.e. casing 1/2 and casing 6/7. In order to fit the casings together, take the head facing casing 1/6, tilt it downwards and let it glide under the side facing casings under number 1 and 6. Your first fitting is done !

3. Then place the side facing casings following the paired numbers, i.e. number 2 of casing 1/2 with casing 2/3, number 3 of casing 2/3 with casing 3/4 and so on. The assembly functions on the basis of the mortice and tenon principle. The strip with the round hole in it only needs to be fitted on the disc which sits inside the casing with which it is to be paired.

4. Finish by doing the same as when you started in step 2, with head facing casing 5/10.

5. Place the BOOGLE[®] scoreboard ; each magnet represents a team.
